STRATEGY & BUSINESS OPERATIONS LEADER

Industrial engineer who builds the operating systems behind $B businesses. Launched a healthcare line of business in 27 days, owned an $18M cost-of-revenue mandate, and ran annual planning and governance for Google's $B Americas Sellside business. Fed LLM-parsed member transcripts into a targeting model at Included Health, and builds his own tools with Claude Code.

CORE COMPETENCIES

Strategy & Operations: Business Operations, Operational Excellence (Lean/Six Sigma), Governance Design, Annual Planning & Goal Setting, Rhythm of Business, GTM Strategy, Resource Allocation

Data & Analytics: SQL, BigQuery, Looker, Tableau, Python (ETL/automation), executive KPI dashboards

AI: Gemini, Claude Code, Anthropic API, LLM transcript analysis, targeting models built on ML and LLM inputs

Leadership: Executive advisory (VP/C-level), cross-functional leadership (20+ teams), team leadership (4 direct reports)

PROFESSIONAL EXPERIENCE

Included Health | **Business Operations Manager** | Remote **Jan 2026 – Sep 2026**

Role eliminated in a company-wide reduction

- **Zero-to-one launch:** Built the Total Cost of Care line of business from white paper to live offering in 27 days, then scaled it across a $120M book spanning 13 Fortune 100 accounts, replacing manual operations with a digital-first model in 5 months.
- **$18M cost-of-revenue mandate:** Took ownership of a fragmented $18M cost-of-revenue mandate and shipped its operating cadence in 7 days (weekly execution pulses, monthly forecast and workforce-model locks); quantified initiative-impact reporting went from 54% to 100% within two weeks, giving workforce management the inputs to convert initiatives into FTE impact, and closing planning cycles 25% faster y/y.
- **Capacity model and automation:** Rebuilt a manual workflow into an automated routing model that combined ML model outputs with LLM-parsed member transcripts, and built the capacity model behind it: labor per 100 cases fell from 1.56 to 0.46 FTE, freeing resource against $3M of previously uncommitted opportunity.
- **AI customer-signal synthesis:** Used an LLM to parse member chat and call transcripts into sentiment and objection insights that shaped product design, marketing copy and outreach, and became a targeting signal: over 80% of engaged members went on to have the predicted surgery.
- **Executive governance:** Authored the OKR and goal-setting architecture presented to the COO that shifted the enterprise operating model from activity-based management to outcome-based orchestration, adopted into the FY27 annual operating plan.

Google Global Partnerships | Mountain View, CA **Jan 2022 – Dec 2025**

First Party Data Solutions Consultant *Jul 2024 – Dec 2025*

- **Pipeline analytics to revenue:** Used Gemini to write the PLX SQL script joining sales pipeline and CRM data to product-adoption datasets and built the Looker layer on it, then architected a Q3 Secure Signals sales competition driving $40M incremental revenue vs. target and up to 256% Q/Q growth in pipeline stage movement; methodology adopted by pGTM globally.
- **Product adoption:** Drove adoption of privacy-preserving first-party data solutions (Secure Signals, PPID, PPS) with 30+ Fortune 100 publishers across web, app, and CTV, generating >$100M in incremental annual revenue.

Program Manager, Sellside Partnerships *Jan 2022 – Jul 2024*

- **Business operations:** Ran annual planning, budget, and execution governance for the $B Americas Sellside Partnerships business across 7 vertical teams, 20+ sub-teams, and 200+ stakeholders.
- **Execution governance:** Governed 56 initiatives across 4 core product areas via weekly cross-functional forums and VP QBRs.

Accenture | **Program Manager** | Seattle, WA **Oct 2016 – Feb 2021**

- **Merger integration:** Management consulting engagement lead on a $26.5B telecom merger: governed 24 workstreams under 16 VPs and the integrated plan for 60+ projects through design, development, and testing.

BUILT AND SHIPPED

Operating Model Simulator | monthly capacity, cost and workforce model; TypeScript, 264 tests | bensunter.com/simulator

Comment Export for Sheets | add-on built with Claude Code, live on the Google Workspace Marketplace

Goal Seek: Checked Answers | Sheets add-on built with Claude Code, live on the Google Workspace Marketplace

Android app on Google Play | Kotlin consumer app, Firebase backend, subscriptions and ad SDKs; 500+ installs, 120 DAU in 30 days

EDUCATION & CERTIFICATIONS

- **B.S. Industrial and Systems Engineering** | University of Florida | May 2016
- **Certifications:** Lean Six Sigma Green Belt (2015) | Google Project Management Certificate (2021)
